

Multi-functional, water displacing rust preventative and lubricant

Description

MOLYSLIP COMBAT spray is an advanced water-displacing fluid which deposits a protective and lubricating film. The petroleum base is reinforced with sophisticated performance additives the bind to metal surfaces protecting them from friction, wear and atmospheric corrosion.

COMBAT is designed as a true multi-purpose product that will displace moisture from surfaces, lubricate, protect from corrosion and act as a penetrating and releasing agent for sized and corroded parts. COMBAT is free from silicones, is non-staining and is suitable for use on most metals. It is inert towards most common plastics and rubbers.

Features and benefits

- Actively displaces moisture from surfaces
- Effective protection against corrosion
- Excellent penetration and release properties
- All round general purpose lubricant

Instructions for use

Shake well, hold can upright and spray from a distance of approximately 15-30cm.

Packaging

400ml aerosol

Technical data

Combat

The logo for MOLYSLIP, featuring the brand name in a bold, italicized, sans-serif font with a registered trademark symbol, set against a red rectangular background.

Technical data (typical values)

Property	Test method	Result
Appearance	-	Pale brown liquid
Film thickness	-	0.005mm
Operating temperature range	-	-50°C to + 140°C

Storage

Store MOLYSLIP COMBAT spray of direct sunlight. Storage temperature should be controlled to between 5°C and 35°C.
